STORIA: la nostra storia è diventata il nostro futuro.

Non abbiamo dimenticato le nostre tradizioni, i valori dei nostri prodotti e, carichi dell'orgoglio di più di 300 anni di storia, continuiamo a fornire ogni anno, con la stessa cura di allora, strumenti utilizzati da milioni di persone in tutto il mondo.

PASSIONE: siamo innamorati dei prodotti che fabbrichiamo.

Dalla storia nasce la nostra forza: la passione per il lavoro trasformata in una filosofia di vita. Una passione tramandata da tradizioni e racconti di famiglie, uomini e donne, che hanno dedicato la loro vita e i loro sforzi alla crescita e allo sviluppo del made in PREMANA.

PREMAX: garanzia di qualità.

La lunga esperienza, la ricerca continua dei migliori materiali, abbinate alla produzione in loco di macchinari progettati specificamente per la fabbricazione di articoli da taglio, ci permettono di offrire una gamma vastissima di prodotti con un elevato livello qualitativo, garantito da controlli accurati effettuati durante la produzione e da test finali realizzati da personale Premax®.

Storia, Passione e Qualità sono il segreto del nostro successo.

History, Passion and Quality are the secret of our success.

HISTORY: our history has become our future.

We have not forgotten our traditions and the value of our products. We are driven by pride stemming from over 300 years of history and continue to supply every year, with the same care as in the past, implements used by millions of people around the world.

PASSION: we love the products we make.

History gives us our strength, a passion for our work transformed into a philosophy of life. A passion handed down through traditions and tales of families, men and women who have dedicated their life and efforts to the growth and the development of their town.

PREMAX: a guarantee of quality.

Vast experience, a continuous search for the best materials and high-tech machinery - specifically projected and made by local factories for the manufacturing of cutting instruments - all allow us to offer a wide range of high quality products guaranteed by controls carried out during the production process and a final test made by highly-skilled Premax® personnel.

PRESENTAZIONE DELLE LINEE DI PRODOTTO

La nostra flessibilità, la nostra sensibilità nel cercare di soddisfare qualsiasi tipo di esigenza del cliente ci hanno portato a realizzare tre diverse linee di prodotto:

LINEA RING LOCK SYSTEM

Ring Lock System l'innovativo sistema di assemblaggio per forbici ed utensili da taglio, sviluppato e brevettato da **Premax®**, che elimina per sempre il problema dell'allentamento della vite e il conseguente mal funzionamento delle lame.

LINEA OPTIMA

Una gamma completa di prodotti fabbricati con caratteristiche qualitative molto elevate. Articoli professionali con un rapporto qualità-prezzo imbattibile, adatti ad una clientela molto esigente ed attenta alle prestazioni dei propri strumenti.

È disponibile in diversi tipi di finiture e materiali per poter soddisfare gusti e necessità dei consumatori.

LINEA OMNIA

Una selezione dei modelli più richiesti, fabbricati con lo scopo di poter offrire un livello di prezzo molto competitivo.

PRODUCT LINES PRESENTATION

Our flexibility and sensitivity in trying to satisfy every type of need expressed by our clients have prompted us to develop three separate lines of products:

RING LOCK SYSTEM LINE

Ring Lock System, the innovative assembly pivot for scissors and cutting tools developed and patented by **Premax®**, which eliminates forever the problem of screw loosening and the consequent bad scissors action.

OPTIMA LINE

A complete range of products manufactured with very high quality features. Professional products with an unbeatable quality-price ratio, suitable for high demanding customers who want the best performance from their tools. The products are available in different finishes and materials to satisfy the tastes and needs of the consumers.

OMNIA LINE

A selection of the most widely requested models, produced with a view to offering a highly competitive price level.

TECNOLOGIA

Il Ring Lock System sviluppato da Premax® è composto da una bussola in acciaio inox, una in lega di alluminio e da un anello in Teflon assemblati con una macchina speciale ad alta precisione usata per il montaggio degli orologi.

Questo permette una regolazione precisa delle lame eliminando il "gioco" delle stesse e garantisce l'uniformità del lotto produttivo.

Il Ring Lock System migliora il movimento della lama, la quale ruotando attorno all'anello in Teflon, materiale auto-lubrificante e indeformabile, mantiene la regolazione del taglio rendendolo costante e garantito nel tempo.

TECHNOLOGY

The Ring Lock System developed by Premax® is made of a stainless steel bearing, an aluminium bearing and a Teflon ring assembled with a special high precision machine used in the watch industry.

This allows a precise setting of the blades, eliminates the blades "twist" and guarantees a uniform quality of the production lot.

The Ring Lock System improves the movement of the blade which, rotating around the Teflon ring - auto lubricating and non-deforming material - keeps the blades set stable and guaranteed forever.

INNOVAZIONE

L'uso delle forbici nel tempo allenta la vite alterando l'efficienza e la precisione del taglio.

Il Ring Lock System sviluppato da Premax® risolve il problema mantenendo costante la regolazione delle lame.

INNOVATION

After using the scissors for some time the screw unties, deteriorating the cutting efficiency and precision.

The Ring Lock System developed by Premax® resolves the problem and keeps a constant blades setting.

PRECISIONE

Con il Ring Lock System sviluppato da Premax® la circonferenza attorno alla quale ruota la lama è del 60% maggiore rispetto alle forbici tradizionali; questa soluzione permette un taglio più morbido e preciso ed una maggiore durata del filo.

PRECISION

With the Ring Lock System developed by Premax®, the circumference around which the blade rotates is 60% bigger than on the traditional scissors, this is the key to a smoother and more precise cut and a longer edge's life.

ATTREZZATURA UTILIZZATA PER I TEST TESTING EQUIPMENT

TEST E CONTROLLI

Con l'ausilio di un'attrezzatura speciale Premax® ha potuto effettuare numerosi test, per certificare l'efficacia del nuovo sistema e garantire il massimo standard qualitativo.

TESTS AND CONTROLS

With a special equipment Premax® has carried out several tests to certify the effectiveness of the new system and guarantee the maximum quality standards.

INNOVAZIONE, TECNOLOGIA, PRECISIONE INNOVATION, TECHNOLOGY, PRECISION

DESIGN

Studi specifici dei movimenti della mano hanno permesso a **Pemax®** di creare un prodotto dall'ergonomia perfetta che assicura un utilizzo estremamente comodo e funzionale. L'ergonomia dei manici unita all'eleganza delle forme rendono queste linee di prodotto veramente uniche ed esclusive.

DESIGN

Specific studies on the hand's movement allowed **Pemax®** to create implements with perfect ergonomics which ensure a very comfortable and functional use.

The ergonomic handles along with the elegant design make these product lines unique and exclusive.

MATERIALI

Gli strumenti sono realizzati con acciai e materie plastiche che hanno superato i test di durata ed affidabilità previsti dalle norme ISO.

MATERIALS

The implements are made with steel and plastic material that have passed endurance and reliability tests in accordance with ISO standards.

OPTIMA *Line*

MADE IN ITALY

Accurate lavorazioni artigianali abbinate a materiali dagli elevati standard qualitativi ci consentono di realizzare degli strumenti con prestazioni e funzionalità elevate e fanno di questa collezione la nostra linea di punta.

Gli articoli sono disponibili in due versioni:

- acciaio al carbonio con rivestimento di nichel e cromo per offrire una buona resistenza alla corrosione;
- acciaio inox, il quale, oltre ad offrire un'elevata resistenza alla corrosione, con la sua finitura sabbiata dà un tocco di eleganza e modernità ad ogni strumento.

Skilled craftsmanship combined with high quality materials: this is the formula that enables us to produce instruments with high performance and functional features, making this our main collection.

The products are available in two versions:

- carbon steel plated with nickel and chrome to ensure good resistance to corrosion;
- stainless steel, which, in addition to its high resistance to corrosion, is sandblasted for a touch of elegance and a modern refinement.

CLASSICA Collection - Ricamo / Embroidery

OPTIMA *Line*

MADE IN ITALY

E' la nostra linea base fabbricata con i migliori acciai al carbonio rivestito di nichel. Una lunga esperienza nella produzione di questa linea garantisce elevati standard qualitativi in termini di precisione, capacità di taglio e durata del filo. Accurate operazioni manuali abbinate alla passione degli artigiani, danno al prodotto un tocco di vera autenticità, tipica del Made in Premax. La CLASSICA collection, a seconda dell'uso specifico dei prodotti, si divide in quattro categorie: ricamo, cucito, sartoria e varie. La linea CLASSICA Ricamo, presentata con diversi design, si caratterizza per le punte molto sottili che permettono un taglio preciso anche nei punti più difficili.

This is our basic line produced with the finest carbon steel, nickel plated. Our long experience in the production of this line ensures high quality standards in terms of precision, cutting capacity and long-lasting sharpness. Accurate manual operations combined with the enthusiasm of the craftsmen give a touch of real authenticity, typical of Premax products. The CLASSICA collection, depending on the specific use of the products, is divided into four categories: embroidery, sewing, dressmaking and other. The CLASSICA Embroidery line, presented with different designs, is characterized by the extra thin points that consent a precise cut even in the most difficult points.

AFFILATRICI - SHARPENING MACHINE

Per chi vuole dare un servizio post vendita ai propri clienti, abbiamo realizzato una macchina specifica per la riaffilatura delle forbici, che permette di ottenere in modo facile un'affilatura professionale.

La macchina consente di realizzare guadagni veramente interessanti ed al tempo stesso di fidelizzare la propria clientela.

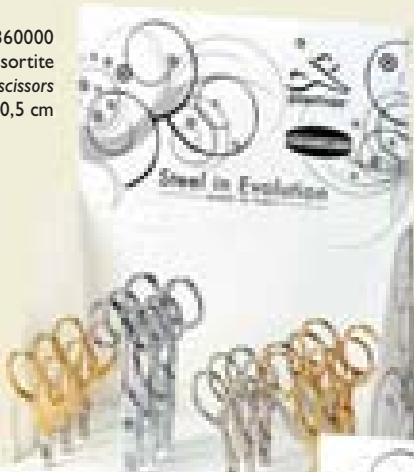

For those who wish to provide their clients with the best after-sale service, we have developed a special machine for sharpening scissors, that gives them a professional cutting edge simply and easily.

The machine provides good additional earnings ensuring at the same time customer loyalty.
